

ACC NR: AP6033054

a plane parallel to the original sheet which divide the foil into parallel layers. This structure is probably responsible for the lower values of mechanical properties in the direction perpendicular to the direction of rolling. When, even small stresses are applied, the foil splits into layers. Orig. art. has: 4 figures.

Title : On the Methods of Injecting Esophageal Lymphatic Vessels

Orig Pub : Tr. Gor'kovskogo gos. med. in-ta, Gor'kiy, Knigoizdat, 1956, 115-117.

Abstract : The thoracic and abdominal cavities were opened and the gastric pylorus was dissected. After washing and tying the stomach in the areas of the fundus and the esophagus, in its upper cervical portion, the esophagus was filled with water until its walls become slightly distended. The specimen was left in warm water for 30-40 min. and the walls of the esophagus and the stomach were lightly massaged. Then a stained substance was injected. In addition to being soaked in the proper solutions,

Razvertki indikatorov (Indicator Scans) Moscow, Voen. izd-vo M-va obor. SSSR,  
1957. 60 p. (Series: Radiolokatsionnaya tekhnika)

Ed.: Vladimirov, V. T., Lt. Col.; Tech. Ed.: Mednikova, A. N.

PURPOSE: This booklet is a part of the radar engineering series "Radiolokatsionnaya tekhnika" (Radar Technique) issued by the Soviet Military Publishing House. The series is intended for officers working with radio devices. The booklet can also be used by the general reader who wishes to become familiar with the operation of radar components and systems.

COVERAGE: A classification of radar indicators and their principle of operation is presented in this booklet. The various scan types and their parameters are also given. Readers who desire thorough knowledge in radar are referred to a number of books on the subject which are either published or planned to be published. The list of books is given on the back inside cover. There are no references. No personalities are mentioned.

Vrublevskiy, Vladislav Iosifovich

Opredeleniye mekhanicheskikh svoystv gornykh porod v proizvodstvennykh usloviyakh  
(Determining the Mechanical Characteristics of Rocks Under Industrial Conditions)  
Kiyev, Gostekhizdat USSR, 1961. 89 p. 1,400 copies printed.

Ed.: N.Kocherga; Tech. Ed.: S. Shafeta.

**PURPOSE:** This booklet is intended for engineering and technical personnel in the coal and mining industries.

**COVERAGE:** The booklet provides a generalized treatment of materials on the matter of determining mechanical indicators of rock properties. Basic views on indicator systems to evaluate the breakdown resistance of rocks are presented. Methods of on-the-spot determination of indicators and of determining correlational connections between mechanical indicators of rock properties are described. The booklet also cites experimental results on determining the strength and stability of coal and of the surface breakdown energy. No personalities are mentioned. There are 47 references, all Soviet.
